Professional Summary

Final-year Computer Engineering student with a strong interest in full-stack web development. Skilled in HTML, CSS, JavaScript, React, Node.js, and MongoDB. Able to build responsive, dynamic, and database-driven web applications. Quick learner and eager to apply technical knowledge to real-world projects and team environments.

EDUCATION

Bachelor of Technology in Computer Engineering
CGPA-6.63

Marwadi University (NAAC A+), 2022 - 2026

Relevant Coursework: Data Structures, Web Development, OOPs, Operating Systems, DBMS

Higher School

Percentage Performance: 61%

krishna international school, Rajkot, 2020-2022

Secondary School

Percentage Performance: 72%

Rkc Rajkumar college Rajkot, Gujarat 2019

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, C++

Frontend: React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB (CRUD operations), MySQL (CRUD)

Tools: VS Code, Git, GitHub, Postman, Xampp

Concepts: OOPs, REST APIs, UI/UX, Front-end & Back-end Integration

PROJECT WORK

AI-Based Expense Tracker

Stack: React.js, Node.js, Express.js, MongoDB, Gemini API

Building a full-stack personal finance tool to track expenses and generate AI-based insights.

- Working on **user authentication system using JWT** and secure login flow
- Backend design includes **RESTful APIs** and MongoDB for data persistence
- Frontend dashboard shows expenses with **interactive pie charts (Chart.js)**
- Exploring **Gemini** to auto-categorize expenses and provide AI suggestions
- Focused on making it responsive, scalable, and integration-ready

Kbc quiz app

Personal Project | ReactJs, Css

A quiz app inspired by *Kaun Banega Crorepati*, focused on conditional rendering and dynamic interaction.

- Built responsive UI using React.js with custom state management
- Implemented question flow, answer validation, and score tracking logic
- Styled using CSS for a clean and mobile-friendly layout

GitHub: https://github.com/Aaditya303-ui/KBC_Quiz

Weather App

Personal Project | HTML, CSS, JavaScript, OpenWeatherMap API

Displays live weather updates using user input and external API data.

- Integrated OpenWeatherMap API for real-time weather fetching
- Built with vanilla JavaScript, responsive layout, and dynamic weather icons
- Focused on user experience with error handling and simple UX

CERTIFICATION

1. Apps with Flutter for Beginners
2. Postman API Fundamentals Student Expert
3. Programming for Everybody – Getting Started with Python

- Net Ninja
- Postman
- Coursera

ACHIEVEMENTS & SOFT SKILLS

- **Soft Skills:** Teamwork, Communication, Time Management
- **Languages:** English, Hindi, Gujarati
- **Interests:** Music, Reading Self-Development Books
- **Clubs:**
 - Evolead Club, Marwadi University
 - Young Indians (YI) Group
 - Marwadi Coding Club
- **Contests:**
 - Web Horizons 2024
 - Logic Leap Race
- **Sports Achievement:**
 - Represented school at National Level in Taekwondo (2019)
